

The Wisconsin No Call Law should not be touched or adjusted to let anyone find a loop hole. Do you like to receive calls at all hours of the day to listen to a telemarketer be rude to you and not take no and then to hang up on them just to have them call you right back. Not far to allow this to start up again. I thought laws were to protect the public. Where is our government? These telemarketers and bankers are harassers and this needs to stop. We have SPAM blockers on our computers to stop this why not save this law to protect the public.
